DETAILED ACTION

1. Drawings filed on April 9, 2004 are accepted.
2. Claims 1-40 are allowed.

The following is an examiner's statement of reasons for allowance: the primary reason for allowance of claims 1-18 is the inclusion of, inter alia, the feedback processor (313) operable to provide a feedback signal that corresponds to the amplified signal and that has been converted to the intermediate frequency, the feedback signal combined with a signal corresponding to a base band signal to provide the input signal for the amplifier (303). And the primary reason for allowance of claims 19-40 is the inclusion of, among other things, the delta signal modulator (DSM) (207) operable to process an input signal within an intermediate frequency band and to output an output signal within a radio frequency band to control or drive the switching amplifier (203). None of the prior art of record teaches or suggests a radio frequency switching power amplifier that includes these features of the claimed invention. Therefore, claims 1-40 are allowed.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
